

**IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF MICHIGAN**

<p>KIM PRENTICE and CHASTITY KELLY, individually and on behalf of all others similarly situated,</p> <p style="text-align: center;">Plaintiffs,</p> <p style="text-align: center;">v.</p> <p>PERRIGO COMPANY,</p> <p style="text-align: center;">Defendant.</p>	<p>Case No. 1:22-cv-00170-PLM-SJB</p> <p>FIRST AMENDED CLASS ACTION COMPLAINT</p> <p>JURY TRIAL DEMANDED</p>
---	--

Plaintiffs Kim Prentice and Chastity Kelly bring this action on behalf of themselves and all others similarly situated against Defendant Perrigo Company.

INTRODUCTION

1. Defendant makes, sells, and markets “GoodSense” over-the-counter cough, cold and flu medicine (the “Non-Drowsy GoodSense Products” or “Products”), including generic GoodSense versions of brands like DayQuil and Robitussin.¹ Like the branded versions, these medicines contain the active ingredient Dextromethorphan Hydrobromide (“DXM”), an ingredient that causes drowsiness.

2. Defendant’s Non-Drowsy GoodSense Products state prominently on the front of their label that they are “Non-Drowsy” and “Daytime” products (juxtaposed against Defendant’s “Nighttime” versions). By prominently labeling these products as “Non-Drowsy” and “Daytime,” Defendant led Plaintiffs and other reasonable consumers to believe that the Non-Drowsy

¹ The Non-Drowsy GoodSense Products include all GoodSense products sold by Defendant that are labeled “Non-Drowsy” and that contain Dextromethorphan Hydrobromide.

GoodSense Products do not cause drowsiness, and that drowsiness is not a side effect of those products. Defendant also led Plaintiffs and other reasonable consumers to believe that those products are for use during the day, and can be safely and satisfactorily consumed during waking hours, at work, and while driving and operating machinery.

3. But the truth is that products containing DXM—and thus the Non-Drowsy GoodSense Products—do cause drowsiness, and that drowsiness is a known side effect of DXM (a fact not known by the average consumer). In reality, the Products cause drowsiness, which in effect destroys the primary reason for purchasing the “Daytime” Products in the first place – for use during the day, when consumers do *not* want to be drowsy.

4. In this way, Defendant misled Plaintiffs and other consumers about the effects of the Non-Drowsy GoodSense Products. This was a material misrepresentation that Plaintiffs—and other reasonable consumers—relied on when deciding to buy the products. Had Defendant been truthful, Plaintiffs and other consumers would not have purchased the products or would have paid less for them.

5. Plaintiffs bring this case for themselves and for millions of other consumers who purchased Non-Drowsy GoodSense Products.

PARTIES

6. Plaintiff Kim Prentice is a citizen of Colorado (domiciled in Aurora).

7. Plaintiff Chastity Kelly is a citizen of Tennessee (domiciled in Union City).

8. The proposed class (identified below) includes citizens of every state within the United States.

9. Defendant Perrigo Company is a Michigan corporation with its principal place of business in East Lansing, Michigan, and has been doing business in the State of Michigan during all relevant times. Directly and through its agents, Perrigo Company has substantial contacts with,

and receives substantial benefits and income from, the State of Michigan.

JURISDICTION AND VENUE

10. This Court has subject matter jurisdiction under 28 U.S.C. § 1332(d)(2). The amount in controversy exceeds the sum or value of \$5,000,000, exclusive of interest and costs, and the matter is a class action in which one or more members of the proposed class are citizens of a state different from the Defendant.

11. The Court has personal jurisdiction over Defendant because Defendant is incorporated in this State and maintains its principal place of business in this State.

12. Venue is proper under 28 U.S.C. § 1391(b)(1) because Defendant would be subject to personal jurisdiction in this District given that Defendant is incorporated and maintains its principal place of business in this District.

FACTUAL BACKGROUND

A. Defendant makes, markets, and sells GoodSense products prominently labeled “Non-Drowsy.”

13. Defendant manufactures, distributes, markets, and sells the Non-Drowsy GoodSense Products.

14. The front label of each Non-Drowsy GoodSense Product prominently states that the product is “Non-Drowsy.” For example:

GoodSense Daytime Cold & Flu Multi-Symptom Relief Liquid²

² <http://goodsense.com/products/goodsense-daytime-cold-and-flu-multi-symptom-relief-liquid>

GoodSense Tussin DM Cough & Chest Congestion³

³ <http://goodsense.com/products/goodsense-tussin-dm-cough-and-chest-congestion-liquid>

15. Further, the Products are sold as a “Daytime” products that are meant to be consumed during the day, and offered for sale as an alternative to Defendant’s Nighttime Cold & Flu Relief Products (which have no “Non-Drowsy” claim), such as the one pictured below:

16. In reality, however, the “Daytime” and “Non-Drowsy” versions cause drowsiness and drowsiness is a known side of effect of the products. Accordingly, if a reasonable consumer knew the truth, it would eviscerate the reason that consumers buy “Daytime” or “Non-Drowsy” cold and flu relief products in the first place: to avoid drowsiness when they need to be alert.

17. These representations are materially the same across all Non-Drowsy GoodSense Products.

18. Based on the prominent “Non-Drowsy” and “Daytime” label included on the face of each product, a reasonable consumer would believe that the products do not cause drowsiness.

That is, a reasonable consumer would believe that drowsiness is *not* a side effect of the product.

19. Indeed, Defendant labeled the products this way because it intended consumers to rely on the labels and to believe that the products would not cause drowsiness, so that consumers would buy more products or pay more for them.

B. The Non-Drowsy GoodSense Products cause drowsiness.

20. The Non-Drowsy GoodSense Products all contain 20 mg of DXM per dose.

21. In truth, products containing DXM—like each of the Non-Drowsy GoodSense Products—do cause drowsiness. Drowsiness is a documented side effect of DXM at the recommended dosages. Authorities such as the National Library of Medicine ⁴ list drowsiness as a side effect of DXM.

22. In fact, drowsiness is a common side effect at the recommended dosages. According to a 2017 GlaxoSmithKline presentation on drug labeling, a “common” adverse reaction (i.e., side effect) is one that occurs in 3% or more drug takers and a “very common” side effect occurs in 10% or more drug takers. Similarly, Pfizer’s safety data sheet for DXM drugs states that “drowsiness” is a “common” adverse reaction associated with “clinical use.” ⁵ For example, one study of DXM found that “[s]omnolence is a common side effect of centrally acting antitussive drugs” like dextromethorphan, and that 10.4% of users of products containing dextromethorphan develop drowsiness within three days of starting treatment with DXM cough medicine.⁶ The “cases of intense somnolence” were “related only to dextromethorphan” and not

⁴ [Dextromethorphan: MedlinePlus Drug Information](https://medlineplus.gov/druginfo/meds/a682492.html), National Library of Medicine, <https://medlineplus.gov/druginfo/meds/a682492.html> (last accessed November 22, 2021).

⁵

⁶ E. Catena and L. Daffonchio, “Efficacy and Tolerability of Levodropropizine in Adult Patients with Non-productive Cough, Comparison with Dextromethorphan,” 10 Pulmonary

to the other drug studied. And the patients in this clinical study were given an even smaller dosage of DXM (15 mg three times a day) than the recommended dose found in Non-Drowsy GoodSense products.⁷

23. Furthermore, the FDA's adverse event report database confirms that sedation (i.e., drowsiness) is one of the most frequently-cited side effects of dextromethorphan-containing products.⁸

24. For this reason, the Federal Aviation Administration prohibits pilots from flying after ingesting DXM.⁹ Indeed, drugs like DayQuil (which Defendant copies) are "antihistamine free," yet are still banned by the FAA because they have DXM and DXM causes drowsiness:¹⁰

Pharmacology & Therapeutics 89-96 (1997). The study reports this side effect as "somnolence." Somnolence means "the quality or state of being drowsy." Merriam Webster Dictionary, <https://www.merriam-webster.com/dictionary/somnolence> (last accessed November 22, 2021).

⁷ For example, GoodSense Daytime Cold & Flu Multi-Symptom Relief Liquid contains 10 mg of DXM per 15 ml of syrup and the recommended dosage is 30 ml orally every 4 hours. <http://goodsense.com/products/goodsense-daytime-cold-and-flu-multi-symptom-relief-liquid>. Similarly, GoodSense Tussin DM contains 20mg of DXM per 10 ml of syrup and the recommended dosage is 10 mL orally every 4 hours. <http://goodsense.com/products/goodsense-tussin-dm-cough-and-chest-congestion-liquid>.

⁸ Sedation is associated with drowsiness. See IV/Monitored Sedation, American Society of Anesthesiologists, <https://www.asahq.org/madeforthismoment/anesthesia-101/types-of-anesthesia/ivmonitored-sedation/> (even "minimal" sedation means that "you'll feel drowsy")

Cough	Cough/cold products	<p>Coricidin (allowed if no chlorpheniramine)</p> <p>guaifenesin (found in Mucinex and Robitussin)</p> <p>Mucinex fast-max severe congestion and cough (liquid)</p> <p>Identify combo vs isolated</p>	<p>dextromethorphan (Delsym)</p> <p>Dayquil (contains dextromethorphan)</p> <p>Most “night-time” or “PM” medications contain a sedating antihistamine:</p> <ul style="list-style-type: none"> - Coricidin HBP cough & cold (contains chlorpheniramine) - Nyquil (contains doxylamine) 	<p>Most cough medications are safe for flight, but caution for combination products with sedating antihistamines. If the label states PM (for nighttime use) or DM (containing dextromethorphan), you should not fly for at least 5 half-lives after the last dose (see above).</p>
--------------	---------------------	---	---	--

C. Defendant’s Non-Drowsy representations misled reasonable consumers.

25. The Food and Drug Administration prohibits drug labeling that is “false or misleading.” 21 C.F.R. § 201.6. It is misleading to label a product “Non-Drowsy” when it does cause drowsiness, or if drowsiness is a known side effect of one of its active ingredients.

26. This case is about Defendant’s affirmative, “Non-Drowsy” and “Daytime” representation on the Product labels. No FDA regulation allows antitussives containing DXM to be labeled “Non-Drowsy” and “Daytime” and the FDA has never considered whether this claim is false and misleading (nor would the FDA ever approve such a claim, because it is in fact false and misleading).

27. Plaintiffs are not seeking to require Defendant to add any additional warning or disclosure to the label. Instead, Plaintiffs seek to require Defendant to remove the misleading “Non-Drowsy” statement, that Defendant has voluntarily added to sell more products.

28. Based on the fact that Defendant labels the Non-Drowsy GoodSense Products as “Non-Drowsy,” a reasonable consumer would expect that those products do not cause drowsiness. Similarly, a reasonable consumer would expect that drowsiness is not a side effect of the products (much less a common side effect). Indeed, according to Consumer Reports,

“‘Non-drowsy’ is code for antihistamines and other medications that don’t make you sleepy.”¹¹

This is the plain meaning of “non-drowsy,” which means “not causing or accompanied by drowsiness.”¹²

29. Unlike Defendant, some other drug makers do not falsely claim that DXM-products are non-drowsy. For example, DXM is an active ingredient in Mucinex DM, sold by Reckitt. But the Mucinex label does not claim that Mucinex DM is non-drowsy, because this is not the truth:

30. Defendant could have simply omitted the false and misleading statements, “Non-Drowsy” and “Daytime” from its products.

31. Or, if Defendant wanted to say something to indicate that a Non-Drowsy GoodSense Product might cause *less* drowsiness than another GoodSense product, it could have made a truthful statement to this effect, as other drug makers do.

32. For example, Dramamine contains an active ingredient that causes drowsiness,

¹¹ “[How to read over the counter \(OTC\) drug labels,” Consumer Reports, https://www.consumerreports.org/cro/2014/04/how-to-read-over-the-counter-drug-labels/index.htm](https://www.consumerreports.org/cro/2014/04/how-to-read-over-the-counter-drug-labels/index.htm)

¹² <https://www.merriam-webster.com/medical/nondrowsy>

Dimenhydrinate. Dramamine also sells a “less drowsy” version that contains a different active ingredient, Meclizine, which causes less drowsiness. The front label of Dramamine Less Drowsy prominently displays that it is “less drowsy”:

33. Because Defendant makes and sells the Non-Drowsy GoodSense Products, Defendant researched the known and common side effects of DXM. This is diligence that large companies like Defendant would do when selling a drug. As a result, Defendant knew that DXM causes drowsiness. Furthermore, Defendant controls its labeling, knowingly put on the “Non-Drowsy” and “Daytime” representations, and know the plain meaning of “Non-Drowsy.” Finally, it is standard practice in the industry to test labeling with consumers, and Defendant’s testing would confirm that “Non-Drowsy” is misleading. For these reasons, Defendant knew that its labeling was false and misleading, or were reckless or willfully blind to this fact. And as alleged above, Defendant intended that consumers would rely on the “Non-Drowsy” and “Daytime” labeling, so that consumers would purchase more products, pay a price premium, and buy them as alternatives to its “Nighttime” products.

34. Whether or not an over-the-counter drug causes drowsiness is material to a reasonable customer. In certain situations, consumers prefer over-the-counter drugs that will not make them drowsy to products that may make them drowsy. For example, all else equal, a reasonable consumer would prefer to take a drug that does not cause drowsiness to one that does cause drowsiness during the day (or any periods of time when they plan to be awake). As a second example, if a consumer is planning to engage in activities that require them to be alert, or during which they would prefer to be alert, that consumer would prefer to take a drug that does not cause drowsiness to one that does. Indeed, in many situations, taking a drug that does or can cause drowsiness can be dangerous. For example, taking a drug that causes drowsiness while driving, or flying a plane, is dangerous.

35. Defendant's false statements increased the demand for Non-Drowsy GoodSense Products and allowed Defendant to charge a price premium. As explained above, consumers specifically value the "Non-Drowsy" and "Daytime" claim because consumers demand cough medicine that will not make them drowsy (e.g., during the day, at work or while driving) and that they can take during the day. As a result, Defendant was able to charge more for these products than it would have been able to had the labeling been truthful. Accordingly, as a direct result of Defendant's false statements, Defendant was able to charge a price premium for these products. As purchasers, Plaintiffs and each class member paid this price premium and sustained economic injury.

36. For example, on Amazon.com, a bottle of "Non-Drowsy" DayTime Cold & Flu sold through the GoodSense store is currently priced at \$6.04 (for 8 ounces). This price is artificially inflated by the misleading "Non-Drowsy" and "DayTime" claims. If these misleading claims were removed, demand would drop, which in turn would reduce the market

price. This price premium can be quantified (i.e., a dollar figure measured) using expert economic analysis of data that includes, among other things, sales and pricing information uniquely within the possession of Defendant.

37. In addition, because the Non-Drowsy GoodSense Products actually do cause drowsiness, Plaintiffs and each class member did not get what they paid for: a cough medicine that does not cause drowsiness. Instead, they received something that is worth less: a cough medicine that does cause drowsiness. Plaintiffs and each class member sustained an economic injury for this additional reason, i.e., they received something worth less than the price they paid for it.

38. Moreover, the Non-Drowsy GoodSense Products are sold specifically for use in situations where it is not acceptable for consumers to become drowsy (e.g., while driving, working, or supervising children). As a result, the products that Plaintiffs and each class member did receive in exchange for the price they paid—Non-Drowsy GoodSense Products that cause drowsiness—were not suitable for, and were thus worthless for, their intended purpose. So the economic injury Plaintiffs and each class member sustained consists of the entire purchase price of the products, because what they received was worthless for its intended use.

D. Plaintiffs were misled by Defendant’s misrepresentations.

39. On November 1, 2021, Plaintiff Prentice bought a bottle of GoodSense “Non-Drowsy” Daytime Severe Cold & Flu from Walmart in Aurora, Colorado. The package said “Non-Drowsy” and “Daytime” prominently on the label, and she read and relied on those statements when purchasing the product. Accordingly, these representations and warranties were part of the basis of the bargain, in that she would not have purchased the GoodSense “Non-Drowsy” Daytime Severe Cold & Flu Relief on the same terms, or would not have purchased

them at all, had she known these representations were not true. However, Plaintiff Prentice did not receive the benefit of her bargain because her Non-Drowsy GoodSense Product was not, in fact, “Non-Drowsy” or a “Daytime” medication. When Plaintiff Prentice took the recommended dose of the medication as directed by Defendant, she became unexpectedly drowsy. Plaintiff was not on any other medication that would have caused drowsiness, and there was no other potential cause for this drowsiness, aside from the ingredients in the medication. She would not have bought this product had she known that the product did, in fact, cause drowsiness, and that drowsiness was a known side-effect of the product. The price Plaintiff Prentice paid for the GoodSense medication was inflated due to the misleading “Non-Drowsy” and “DayTime” labels, for the reasons explained above. In fact, because the product caused drowsiness, it was worthless to her.

40. On October 12, 2021, Plaintiff Kelly bought a bottle of GoodSense “Non-Drowsy” Tussin DM from Walmart in Nashville, Tennessee. The package said “Non-Drowsy” and “Daytime” prominently on the label, and she read and relied on those statements when purchasing the product. Accordingly, these representations and warranties were part of the basis of the bargain, in that she would not have purchased the GoodSense “Non-Drowsy” Tussin DM on the same terms, or would not have purchased them at all, had she known these representations were not true. However, Plaintiff Kelly did not receive the benefit of her bargain because her Non-Drowsy GoodSense Product was not, in fact, “Non-Drowsy.” When Plaintiff Kelly took the recommended dose of the medication as directed by Defendant, she became unexpectedly drowsy. Plaintiff was not on any other medication that would have caused drowsiness, and there was no other potential cause for this drowsiness, aside from the ingredients in the medication. She would not have bought this product had she known that the product did, in fact, cause

drowsiness, and that drowsiness was a known side-effect of the product. The price Plaintiff Kelly paid for the GoodSense medication was inflated due to the misleading “Non-Drowsy” and “DayTime” labels, for the reasons explained above. In fact, because the product caused drowsiness, it was worthless to her.

41. To be sure, Plaintiffs would purchase Non-Drowsy GoodSense Products again if they were actually “Non-Drowsy” (i.e., if the product was sold as advertised). Plaintiffs, however, face an imminent threat of harm because they will not be able to rely on the labels in the future, and thus will not be able to purchase the products.

CLASS ACTION ALLEGATIONS

42. Plaintiffs brings the asserted claims on behalf of the proposed class of: all persons who purchased a Non-Drowsy GoodSense Product in the United States during the applicable statute of limitations (the “**Nationwide Class**”).

43. Plaintiff Prentice also brings those claims on behalf of a subclass of consumers who, like Plaintiff Prentice, purchased Non-Drowsy GoodSense Products in Colorado (the “**Colorado Subclass**”).

44. Plaintiff Kelly also brings those claims on behalf of a subclass of consumers who, like Plaintiff, purchased Non-Drowsy GoodSense Products in Tennessee (the “**Tennessee Subclass**”).

45. The following people are excluded from the Class and the Subclasses: (1) any Judge or Magistrate Judge presiding over this action and the members of their family; (2) Defendant, Defendant’s subsidiaries, parents, successors, predecessors, and any entity in which the Defendant or its parents have a controlling interest and its current employees, officers and directors; (3) persons who properly execute and file a timely request for exclusion from the

Class; (4) persons whose claims in this matter have been finally adjudicated on the merits or otherwise released; (5) Plaintiff's counsel and Defendant's counsel, and their experts and consultants; and (6) the legal representatives, successors, and assigns of any such excluded persons.

Numerosity

46. The proposed classes contain members so numerous that separate joinder of each member of the class is impractical. There are millions of proposed class members.

Commonality

47. There are questions of law and fact common to the proposed classes. Common questions of law and fact include, without limitation:

- Whether the Non-Drowsy GoodSense Products cause drowsiness;
- Whether Defendant's labelling of the Non-Drowsy GoodSense Products as "non-drowsy" and "daytime" is deceptive and misleading;
- Whether Defendant violated state consumer protection statutes;
- Whether Defendant committed a breach of express warranty; and,
- Damages needed to reasonably compensate Plaintiffs and the proposed classes.

Typicality

48. Plaintiffs' claims are typical of the proposed class. Like the proposed class, Plaintiffs purchased Non-Drowsy GoodSense Products. Like the proposed class, Plaintiffs would not have purchased the products, or would have paid less for them, had they known that they cause drowsiness.

Predominance and Superiority

49. The prosecution of separate actions by individual members of the proposed

classes would create a risk of inconsistent or varying adjudication with respect to individual members, which would establish incompatible standards for the parties opposing the class. For example, individual adjudication would create a risk that breach of the same express warranty is found for some proposed class members, but not others.

50. Common questions of law and fact predominate over any questions affecting only individual members of the proposed classes. These common legal and factual questions arise from certain central issues which do not vary from class member to class member, and which may be determined without reference to the individual circumstances of any particular class member. For example, a core liability question is common: whether Defendant breached an express warranty by falsely marketing products that cause drowsiness as “Non-Drowsy.”

51. A class action is superior to all other available methods for the fair and efficient adjudication of this litigation because individual litigation of each claim is impractical. It would be unduly burdensome to have individual litigation of millions of individual claims in separate lawsuits, every one of which would present the issues presented in this lawsuit.

CAUSE OF ACTION

Count I: Breach of Express Warranty (on behalf of Plaintiffs, the Nationwide Class, the Colorado Subclass, and the Tennessee Subclass)

52. Plaintiffs incorporate by reference each and every factual allegation set forth above.

53. Plaintiffs bring this cause of action on behalf of themselves and the Nationwide Class.

54. Plaintiff Prentice also brings this cause of action on behalf of the Colorado Subclass.

55. Plaintiff Kelly also brings this cause of action on behalf of the Tennessee Subclass.

56. Defendant, as the designer, manufacturer, marketer, distributor, and/or seller of the Non-Drowsy GoodSense Products, issued material, written warranties by representing that the products were “Non-Drowsy” and were “Daytime” products. These were an affirmation of fact about the products (i.e., a description of the effects) and a promise relating to the goods.

57. Defendant marketed the Non-Drowsy GoodSense Products to consumers, and Defendant’s warranty was the basis of the bargain and was relied-upon by Plaintiffs and Class members.

58. The Non-Drowsy GoodSense Products do not conform to the above-referenced representation because they cause drowsiness. Thus, the warranty was breached.

59. Plaintiffs and members of the Classes were injured as a direct and proximate result of Defendant’s breach because (a) they would not have purchased Non-Drowsy GoodSense Products if they had known that the products cause drowsiness, and/or (b) they overpaid for the products because the products are sold at a price premium due to the warranty.

60. Plaintiffs provided Defendant with notice of this breach of warranty, by mailing a notice letter to Defendant’s headquarters on February 11, 2022.

Count II: Intentional Misrepresentation
(on behalf of Plaintiffs, the Nationwide Class,
the Colorado Subclass, and the Tennessee Subclass)

61. Plaintiffs incorporate by reference each and every factual allegation set forth above.

62. Plaintiffs allege this claim individually and on behalf of the Nationwide Class.

63. Plaintiff Prentice also brings this cause of action on behalf of the Colorado Subclass.

64. Plaintiff Kelly also brings this cause of action on behalf of the Tennessee Subclass.

65. As alleged in detail above, Defendant's labeling represented to Plaintiffs and Class members that the Products do not cause drowsiness, that drowsiness is not a side effect of these products, and that the Products are for "Daytime" use.

66. These representations were false and misleading. As alleged above, the Products do cause drowsiness and drowsiness is a documented side effect.

67. As alleged in detail above, when Defendant made these misrepresentations, it knew that they were false, were reckless to the truth, or were willfully blind.

68. Defendant intended that Plaintiffs and Class members rely on these representations and Plaintiffs and class members read and reasonably relied on them.

69. Defendant's misrepresentations were a substantial factor and proximate cause in causing damages and losses to Plaintiffs and Class members.

70. Plaintiffs and Class members were injured as a direct and proximate result of Defendant's conduct because (a) they would not have purchased the Products if they had known that they cause drowsiness, and/or (b) they overpaid for the products because they are sold at a price premium due to the misrepresentation.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs, individually and on behalf of all others similarly situated, seeks a judgment against Defendant as follows:

- A. An order certifying the asserted claims, or issues raised, as a class action;
- B. A judgment in favor of Plaintiffs and the proposed classes;
- C. Damages, including statutory, treble, and punitive damages where applicable;
- D. Restitution;

- E. Disgorgement, and other just equitable relief;
- F. Pre- and post-judgment interest;
- G. An injunction prohibiting Defendant's deceptive conduct, as allowed by law;
- H. Reasonable attorneys' fees and costs, as allowed by law; and
- I. Any additional relief that the Court deems reasonable and just.

JURY DEMAND

Plaintiffs demand a trial by jury on all causes of action and issues so triable.

Dated: May 27, 2022
